Serving A Most Progressive People In The Most Prosperous District In Central Alberta

VOL. 8, NO. 40

MIRROR, ALTA., JULY 27, 1922

\$2.00 PER YEAR

Voiles and Marquisettes

We have them in Dress Lengths and by the yard. There are no two pieces alike, therefore no danger of two ladies having the same pattern. Something for every taste and fancy. Marquisettes, Brown and blue with beautiful floral designs. Voiles, Blue with satin stripes and considerable white which relieves the plainness. Cream with floral and check design. Blue with white and colored stripes. Sky with cream flower. White with mauve stripes and flower, and several other pieces. Just come in and look them over and be convinced of their beauty and quality.

Bungalow Aprons

A good assortment to choose from in light and dark floral designs, light and dark stripes, also figured. They are very reasonably priced and much cheaper than you could buy the goods and make them. Prices ranging from 95c to \$2.25.

Girls' Gingham Dresses

Just the thing for the little girls, so cool and economical. In all colors, Pink, Check, Dotted, Blue, Stripes and Brown. Get your choice while the getting is good.

Gents' Trousers

We have a special on Trousers and they are surely a bargain at the price. Something for every day or knockabout. Just come in and look them over, they are all we say they are, a real bargain.

Gentlemen: How about a New Suit? Our new styles and samples are in and needless to say a guarantee with every suit. If not satisfactory in every way, your money refunded. Can you beat that. The House of Hobbs is in clothes.

Groceries

We stock only the best lines and give satisfaction on every purchase. The quality remains long after the price is forgotten.

SPORTS DAY A HUGE SUCCESS

A large crowd was in Mirror on Wednesday afternoon, July 26th, to celebrate Mirror Annual Sports Day, given under the auspices of the Mirror Athletic Club. It was a great day in every way, the weather was of the best, the receipts totalled into the hundreds, cars were in evidence from nearby and distant towns, while the surrounding country was well represented. The baseball diamond was fast and the grounds were in good shape for carrying out the different items on the program and the committee in charge kept things on the go.

The day's sport commenced with a ball game Clive and Lacombe, and the teams battled for nine innings for the opportunity of sharing in the prize money. Lacombe proved the better of the two teams and won 12 to 10, although Clive staged a ninth inning rally that brought them up to within striking distance.

The day's sport commenced with a ball game Clive and Lacombe, and the teams battled for nine innings for the opportunity of sharing in the prize money. Lacombe proved the better of the two teams and won 12 to 10, although Clive staged a ninth inning rally that brought them up to within striking distance.

The second series between Huxley and Mirror was a fiasco from the beginning to so far as the latter were concerned, and the locals were handed a gooseline from start to finish, score 18 to 9. (Say it with flowers) Mirror failed to even play good ball; Huxley ran wild on the bases. Mirror players were credited with 6 hits and 13 errors, and Huxley with 13 hits and 3 errors, and that just about describes the brand of ball played. Sherwood for Mirror was baited from the box in the fifth and Orser finished the game.

Ray - rf Sherwood Orser Cairns Fullerton

Huxley.....410 133 09-15
Mirror.....000 000 00-0

The athletic events were run off in short order and were keenly contested. In the 100 yard dash for men, F. L. Bassett took the first prize and A. Ray, second. The boys' race for 16 years and under was won by Herman Schultz, with Robt. Carter second. Girls' race, 16 years and under, Florence Hamilton first and Grace Ballantyne second, it requiring another heat to decide the winner of second prize. Mrs. Bissett won the ladies' race, while Mrs. Albert Ray was second.

There were seven entries in the high jump but five failed to clear the bar at four foot nine inches, and the fight for first place narrowed down to Ray and Sherwood, the former finally winning.

The Huxley-Lacombe game was the pick of the tournament with Lacombe having the best of the argument all the way through. Lacombe made the first two counters in the third innings while Huxley evened the score in the next half of the fourth. Lacombe came back strong in the fifth and duplicated the trick, and to put the game on ice added one in each of the next two innings.

Norris for Lacombe was there with the big slick and his hitting was a feature. Orser twirled a great game, besides hitting a home run; his support was also of the best. Pat Fred C. Hazell had a booth on the grounds and catered to the hungry and thirsty ones.

Enough money was subscribed by the business men to more than meet the prizes offered.

LOCAL AND DISTRICT NEWS

Mrs. G. K. Tilley and son Andrew, are spending a few days in Edmonton.

Miss Esther Albrecht, of Edmonton, is visiting with Mrs. Carl McCormack.

W. Sharpe has gone to Ponoka to work on the new addition to the Asylum.

J. W. Spiece has bought the building in which he has been living for some time.

No man is stronger than his stomach. Tanlac will make your stomach strong. N. J. Devereaux.

Miss Winnie Oldring, local telephone agent, is spending a two weeks' holiday with relatives in Calgary.

Mrs. W. J. Paton, accompanied by her sons Mack and Jack, and grandson, Billy Mackay, returned to Mirror on Thursday of last week.

The safest and surest way back to health, strength and happiness is by the Tanlac route. N. J. Devereaux.

Mr. and Mrs. Ray Simpson, Mr. and Mrs. John Sorum, Mr. and Mrs. Albert Ray, and Ross Estell left this (Thursday) morning for a week's outing at Pine Lake.

A. A. White, a well-known Kentucky farmer, and he could beat his hands shucking corn after taking Tanlac. N. J. Devereaux.

A meeting of all those interested in the Mirror Athletic Club will be held in the library building on Friday evening, July 31, at 8:30 o'clock. Baseball, curling and hockey will come up for discussion. All accounts against the club should be rendered to the secretary, Mrs. J. Kehoe, before that date.

Miss Hazel and two assistants are visiting the Alts, Bashaw and Mirror parishes for the purpose of lecturing on the latest methods of Sunday School teaching. They will be in Mirror on Monday and Tuesday of next week. A meeting will be held for children at 7 p. m. Monday, and for parents and adults interested at 8 o'clock the same evening, on the Rectory grounds.

A number of the members of the Masonic fraternity and their wives gathered at the home of Mr. and Mrs. H. Shepherd on Monday evening, July 24th, and presented them with a handsome cut glass water set. James Brindle, with a few well chosen remarks, made the presentation and extended to Mr. and Mrs. Shepherd the good wishes of those present. The recipients were taken completely by surprise, and Mr. Shepherd responded in a very suitable manner. The remainder of the evening was spent in a social way, ice cream and cake were served.

Why and Whereof of Prohibitory Laws

Unquestionably there is a considerable degree of restiveness among people over the enactment and subsequent enforcement of prohibitory laws of one kind and another. While this feeling of resentment finds expression most vigorously in connection with prohibitory liquor laws, there is an undercurrent of feeling in relation to other matters as well. But do the people who so vigorously object to these repressive laws ever stop to ask themselves to what extent they are themselves responsible for their enactment?

Prohibitory laws are always the result of excessive over-indulgence, a lack of self-control, or self-denial. This statement holds true not only in regard to liquor legislation, but in regard to practically all laws of a repressive character. For example, the laws passed prohibiting the killing of beaver in Canada were rendered necessary because some hunters and trappers would not deny themselves the pleasure or profit to be derived from killing these industrious little workers. Close seasons for deer, prairie chickens, and all kinds of game had to be established and are enforced for the same reason.

Every year the newspapers of this country are filled with reports of the destruction of millions of dollars worth of valuable forests, and in the vast majority of cases these destructive fires are the result of the carelessness arising out of the lack of a little self-denial on the part of someone who would not take the time or go to the trouble of properly protecting a campfire, or who started a fire for fuel under conditions of wind or in such a place as to make it liable to a conflagration. Some people, too, have a mania for stripping the bark off of birch trees, or otherwise defacing public property which necessitates the enforcement of prohibitory regulations applicable to every body.

One or two farmers in a given community will not exercise the self-denial, or take the precautions necessary, to keep their land free from noxious weeds, with the result that the whole district is threatened with loss. The feeblest result is the passage of laws to compel everybody to destroy weeds. "Keep off the grass" signs in city parks always cause a feeling of indignation because it is felt that these grassy spaces should be for the special use of children on hot summer days. Why, then, are such signs displayed? Because people will be selfish. The temperate use of city park spaces would give them and everybody else real pleasure, but there are those who will persist in making these beautiful places their own with the result that every place is prohibited from walking on the grass.

Some people go fishing and hunt in everything they can, big and little, and keep it up regardless of their requirements for reasonable food, with the result that lakes and streams are fished out. If such people alone were the sufferers from such wholesale destruction they might well be allowed to suffer the penalty of their folly and lack of self-control. But everybody suffers, and so it becomes necessary every now and then to prohibit fishing altogether in such lakes and streams for a few years in order that the stock of fish may be replenished.

Sunday observance laws are passed on strict character as to make that day one which thousands of people believe, instead of hating its coming as a day of joy and gladness. In some respects our Canadian Sunday observance laws are like the blue laws of Puritan New England. Yet these laws have been enacted in order to prevent Sunday becoming even less respectful and sacred than the other six days of the week.

It was not the moderate drinker, the man who really enjoyed a glass of beer as a beverage, who brought about Prohibition. Such a man was not a menace to the whole community. It was the man who drank to excess and in his drunken state was worse than a beast, or an insane man, ill-treating his family, and disturbing the peace of all, who caused such a pervasion of public opinion as to lead to the demand that the sale of intoxicants of all kinds be rigidly prohibited.

It is a law of nature that the innocent must suffer with the guilty. It is a maxim that we must make provision in law and in law enforcement that will result in the greatest good to the greatest number. Hence, the passage of prohibitory laws for the advancement of the public good, and to prohibit the majority from the selfishness and viciousness of the few.

Hand in hand with the passage of such laws—and even more important and lasting in the results to be achieved—is the need for proper training of children in the duties, the obligations, the restrictions involved in Canadian citizenship. There is need for a revival of teaching young to respect the rights and property of others, and the property of the state which is the property of all. There is a crying need for the facilitation of the principles of self-control, self-denial, and self-reliance, the gain to be derived from the practice of conservation in the true sense and meaning of the word.

Canada's Population

Final Figures of the Sixth Census Are Announced

Canada's total population as at June 1st is 5,735,483. This is the final figure issued of the sixth census. The total represents a gain of 1,581,549 over the total population recorded in 1911, an increase of 21.95 per cent. A

total of 1,428,595 of the Canadian population is residing in rural districts as compared with 1,245,878 in urban centers. Ontario leads in population with 2,533,645 residents, followed by Quebec with 2,561,199. Alberta led the way in provincial increase with 77.22 per cent. followed by Saskatchewan with 52.40 per cent. These two western provinces have populations of 558,454 and 757,510 respectively.

Strange Alpine Phenomenon

Pollen of Fruit Trees Whole Country Yellow Hue

A curious Alpine phenomenon is reported in different parts of the Canton of Vaud. When a strong wind covered the whole country around a yellow hue. The Dent Vaillant, 4,500 feet high, looked like a golden dome, and the forests seemed on fire, while Lake Joux resembled a sea of chrysanthemums. The yellow was caused by large masses of pollen from fruit trees, which were blown from the mountains and deposited when the wind dropped. The peasants call it "golden rain."

When Does Bronchial Trouble Begin to Get Serious?

First it was a little throat tickle, then a cough which grows severe, then a neglected cold travels down the lungs, and it's suddenly hard to breathe. To treat throat trouble right, use **Carrington's**. It breaks the cold, always irritates, eases the cough, makes bronchitis disappear, clears out the phlegm and frees the nostrils from crusts and accumulations. You can prevent colds and keep free from Carrington's and bronchial trouble by frequently using this every day. 50c. bottle, 10c. box. Two months' treatment, \$1.00, medium size 25c, small size 15c.

Passing Show.

Immigration for May
Immigration into Canada for the month of May 1922, totaled 11,199, of whom 5,872 were British, 5,866 from the United States and 2,561 from other countries.

CHOLERA INFANTUM

Cholera infantum is one of the fatal ailments of childhood. It is a trouble that comes on suddenly, especially during the summer months and unless prompt action is taken the little one will die. The second **Dr. Williams' Orange Tablets** are an ideal medicine for this ailment. They regulate the bowels and sweeten the stomach, and thus prevent the dreaded summer complaint. They are an absolute safe medicine, being guaranteed to contain neither opiates, nor narcotics or other harmful drugs. They cannot make a child sick, and always do good. The Tablets are sold by medicine dealers or by mail at 25 cents a box from **Dr. Williams' Medicine Co., Brockville, Ont.**

British Engineering Exhibit in 1923

During the year 1920 a very successful exhibition of shipping, engineering and machinery was held in London. Under the same auspices a similar exhibition is now being projected for the autumn of 1923. The preliminary arrangements have already been completed and the management is confident of getting together a magnificent and comprehensive display of engineering exhibits especially relating to shipping and factory equipment.

CATARHAL DEAFNESS

is a greatly relieved by constitutional treatment. It is a constitutional disease, a catarrh of the mucous lining of the Eustachian tube. It is not a local disease, but a systemic one, and when it is entirely cured, the hearing is restored. For this reason, the only safe and reliable method of treatment is by the use of the **Dr. Williams' Pink Pills**, which act on the blood, and thus cure the disease. The **Dr. Williams' Pink Pills** are sold by medicine dealers or by mail at 25 cents a box from **Dr. Williams' Medicine Co., Brockville, Ont.**

Druggists, **R. J. Cheney & Co., Toronto, Ont.**

A Cruise on the Great Lakes

Enjoy to the Fullest Entire the Trip East

The trip to Eastern Canada or the United States can be made doubly enjoyable by including the delightful cruise on the Great Lakes from Port William and Port Arthur to Port McNicoll or Owen Sound on the **Palatine Canadian Pacific Steamers** "Keweenaw," "Astoria" and "Manitowish." Three sailings a week from Port William and Port Arthur every Wednesday and Saturday to Port McNicoll, where direct connection is made with special train for Toronto, and every Thursday for Owen Sound. The Great Lakes trip is a delightful diversion to the East—restful, cool and refreshing.

The Ticket Agent of the Canadian Pacific will be pleased to give full information as to rates, sailings, etc., and arrange every detail for an enjoyable trip.

Saskatchewan Dairy Products
According to figures recently made public the value of dairy products in Saskatchewan in 1921 was \$16,774,445. During the year farmers in the province increased their dairy output by 50,000 tons. Export figures reached a new record, a total of 7,085,452 pounds of butter leaving the province.

Milard's Liniment for Dandruff

TO THE LITTLE MISS THIS FROCK IS SURE TO BRING BLISS

Mothers sometimes find it difficult to please the little miss when selecting clothing for their wardrobe. They feel quite grown-up at that age and their tastes usually run to modes that add materially to their years. Mother, of course, insists on something useful. Here is a suggestion for an afternoon frock which will be to be classed as adorable by the most particular little miss. It is of brown crepe de chine, with plumed flounces of rose crepe, which afford an attractive note of contrast. Very novel is the feather girle, which serves as a distinctive finishing touch.

If China Wakes

According to the **Hamilton Herald** one of the most remarkable pupils in Hamilton public schools is a Chinese lad of fourteen. Last October he could not speak a word of English. Now he has passed the senior grade examination of his school with honors. In eight months he got through the work of four years. An intelligent awakening in China would mean something for the world if that boy is a fair sample of his kind. We know what an awakening has done for Japan.—Woodstock Sentinel-Review.

Millett's Worm Powders are sweet and palatable to children who are expected to take them. They will certainly bring worm trouble to an end. They are a strengthening and stimulating medicine, correcting the disorders of digestion that the worm cause and imparting a healthy tone to the system most beneficial to development.

A Calendar Savings Bank
To encourage the formation of a daily-savings habit, a next home calendar has been devised which can be kept at the proper date only by the insertion of a coin each day. Says an Illustrated article in the August issue of **Popular Mechanics Magazine**, a special slot is also provided in which coins may be inserted without affecting the calendar numbers.

In Libya smoking, drinking and dancing are forbidden by the Senussi law.

NOW DO MY WORK WITH EASE

Because **Lydia E. Pinkham's Vegetable Compound** Restored My Health

Hornell, N. Y.—"I was in bad health, but there didn't seem to be any one thing that would help me. I was tired out all the time and didn't know how to get on my feet. I was irritable and couldn't sleep at night. I had trouble with my bowels and at my periods. It seemed that nearly every one around me knew of my troubles. I wanted to try it. I took **Lydia E. Pinkham's Vegetable Compound** and I feel like a new woman. I do all my own work now except the washing and I do it with ease. I can accomplish as much in a day now as I would have taken two weeks to do in the winter and I try to get every one I know to take your medicine to help them up. You are welcome to use this letter as a testimonial if you like."—Mrs. C. H. HANSEN, 21 Spencer Ave., Hornell, N. Y.

In almost every neighborhood there is a woman who has taken **Lydia E. Pinkham's Vegetable Compound**. They know because they have taken it and have been helped. Why don't you give it a trial?

Says Everybody Easy Mark for "Archie"

No Use in War According to British Artillery Colonel

While the Hunnan helicopter is expected to revolutionize air flying, an artillery colonel opines it will not be of much benefit to armies in the event of war.

According to the Graphic, this officer says a machine would prove an easy mark for a modern "archie" or aircraft gun, its very stability proving its downfall. "It was difficult," declared, "to hit an ordinary airplane flying 10,000 feet high at the rate of 100 miles an hour, but we did it. What about a stationary one?"

When it was pointed out to him that the new machine claimed to be practically invisible at 5,000 feet, the officer replied: "With modern developments in anti-aircraft artillery we could phantom the whole area with high explosive shells, from the explosion of which nothing could escape. Don't think that the 'archie' in an effort to win by any means; it was only in its infancy during the war."

Alberta Coal

Compares Very Favorably With Imported Coal for Smithy Purposes

After extensive experiments with a number of Alberta coal for smithy purposes, the Industrial Research Department of the University of Alberta states that it compares very favorably with imported Pennsylvania coal for this purpose. Comparative tests were made under ordinary blacksmith conditions, and included heating, welding and iron-making. In all these tests the results obtained with the Alberta coal were equally as good, if not better than those obtained with Pennsylvania coal.

Nothing as Good for Asthma, Asthma Remedies come and go every year on the sales of the original Dr. J. H. Kallender's Asthma Remedy grow greater and greater. No further evidence could be asked for. It is remarkable merit. It relieves. It is always of the same unvarying quality which the sufferer from asthma learns to know. Do not wait another attack, but get this splendid remedy today.

Saskatchewan Has Biggest Burden

Liabilities Per Capita Are Greater Than Other Provinces"
Saskatchewan has the largest and Prince Edward Island the smallest number of liabilities per capita among municipalities having a population from one to three thousand. This statement is founded on a report just published by the Dominion Bureau of Statistics. The figures for the larger municipalities have been published earlier. The report refers to the year 1920.

The figures for the western provinces, based on this report, are as follows:

Saskatchewan, \$125.50; British Columbia, \$119.95; Alberta, \$94.45; Manitoba, \$94.47.

No child should be allowed to suffer an hour from worms when prompt relief can be got in a simple but strong remedy—Mother's Grain Worm Expeller.

BOOK ON DOGS
How to Train and How to Feed. Write for free copy. Address for the **M. CLAY, GLOVER, 121 West 24th St., New York, U.S.A.**

Keen Interest Was Taken By Saskatchewan Farmers In The Better Farming Train

The Saskatchewan better farming train brought its highly successful tour to a conclusion recently, and Mr. Williams, agricultural agent of the Canadian Pacific, has expressed his belief that this train, the biggest yet operated, with the biggest attendance, also got bigger and better results than any of its predecessors. Much credit is being accorded to the company for its invaluable co-operation in the enterprise.

"Many times," said Professor Williams, of the Animal Husbandry Department of the College of Agriculture, who was on the train through the whole trip, "will be built as a result of the visit of the Better Farming Train. At almost every point visited, one or more farmers indicated their intention to build a silo as soon as possible and the models exhibited were the subject of much attention, and always produced many questions."

Another matter which was forcibly brought to my attention during the tour was the growing interest in the variety of sweet clover. The tendency to grow such crops and to build silos means much, as it shows that a change in farming methods is being made, which will make for more permanent agriculture, greater prosperity and consequent increase of the farming population. Much interest has also been shown in the various feeds and balanced rations recommended, indicating that dairymen are feeding the stock for market in an agricultural production."

Professor Potts, of the University of Alberta, who was lecturing on dairying and who was in charge of the dairy exhibit car, stated that in the morning and afternoon parts of the province there is a very noticeable increase in the interest taken in one feeding work, and one result of the tour of the train is that convinced, will be that a very large number of dairymen will now adopt this method and many others, formerly doubters, are now convinced of the value of this system.

There was one point to which it was found necessary to allude continuously, according to George Murray, who was in charge of the feed industry car, and that is the necessity of fertilizing every acre of soil. This crop is useful, he states, in two ways, one in supplying a place in the rotation and the other in fertilizing the soil. If not inoculated, there will almost invariably be no nodules on the roots, and no nitrogen will be stored, so that those who do not inoculate will not enrich the soil but further deplete it, and they therefore had the point of growing this crop.

Lubrication, ignition and carburetor troubles were the chief matters which farmers complained of, and the distance of Mr. Josephson in the farm mechanics car, and he believed that an unprecedented number of power units had been repaired by the train. It was for solution to the better farming train.

Both the household science and the forestry sections were very busy throughout the trip, and in both these departments those in charge said that much had been accomplished in conversations and in answering questions, as well as by the lectures delivered.

In the field husbandry car Miss Drayford has been attracted considerable attention. This lady has kept bees for many years near Vancouver, and last year her output of honey reached well over 900 pounds, showing that this is a very profitable side line for those interested in this branch of agriculture, and there are many now farming in Saskatchewan who kept bees in previous provinces who will be glad to know that there is no obstacle to this process in honey production in this province.

K. Flisley, who was in charge of the poultry car the greater part of the trip states there seems to be a good deal of doubt regarding the certain fronted poultry house, some complaining that the birds from their crumb. This, he said, was because the house was overcrowded, and more hens there are the more moisture comes from the condensing breath. A hen's temperature is 106, and also can be kept perfectly well, as long as the air is dry. The cotton fronted poultry house, with its heated walls and properly ventilated has been found absolutely satisfactory at the College of Agriculture.

The total attendance for the four weeks 22,311, and the average daily attendance was 107. The difference between this year and last year would have been many more had it been for the fact that heavy rain spoiled the last day's attendance, when three meetings were scheduled. The average daily attendance was

The Horse and the Tractor

Breaking Farm Horses is Still Big Business

Numerous are the tractors on American farms, the major part of the nation's crop is still produced by horse power, and in the opinion of many who are making a close study of the relative merits of tractor and horse in farm work, the horse is going to have a place on the farm, if not permanently, at least for some time to come. Best results can be obtained, they believe, by using both tractor and horse, so, while the horse is still to handle tractor, farmers are still up against the same old job of breaking in horses.

An Iowa farmer has worked out a method of breaking the big draft horse with a rope, which many of his brother farmers are finding the easiest and simplest way yet known to establish mastery, and teach the young horse how to obey and work.

His method appeals to them because it is quick and easy, and also humane. Just a rope and "Whoo" does the work. The rope is fastened to the halter, then arranged so that it passes through a loop on either side below the neck, and under the forelegs, where it is attached to leather bands on either foot. — *Harper's Bazar*, in the August Popular Mechanics Magazine.

Tomb of Viking Queen

Ship Buried in Clay Has Been Wonderfully Preserved

A romantic picture of Viking life has been revealed by a plowman's discovery of the remains of a ship at Desberg, in South Norway.

The ship was discovered several years before the war, but its workmanship and contents were so wonderful that experts are still bringing to light fresh details of its history. The vessel seems to have been brought inland to be the tomb of a Viking queen. She is believed to have been the mother of the first queen of all Norway, who reigned 1,100 years ago. Her burial place was on deck.

The ship and its cargo have withstood the ravages of time through being buried in solid clay for centuries. It was discovered in 2,000 feet, but the parts have now been moved to a place where they can be studied. The ship was a small one, but it stands in a shed at Christiania University.

Wonderful fabrics were found round the body of the queen, and the body of a little maid was discovered close by with a spinning wheel. Two Masters. A Korean who was in mission service for a number of years was at last discovered to have two wives—a very common practice in Korea. It was the duty of the mission board to administer the highest and gravest penalty to put away his second wife. The Korean demanded a final statement to the effect that his course was sinful. The Bible was read, but not in vain. The Korean brother produced a text that he considered was indisputable evidence that two wives were contrary to Bible teaching, and thereupon read: "No man can serve two masters."

Good News from Quebec. Officials of the Provincial Department of Agriculture state that they have not seen for years better conditions for crops in the province than those which have prevailed since the middle of May. The hay crop, the basis of the dairying prosperity of the province, is assured, meaning that the farmers will have at their disposal a crop valued at \$75,000,000.

Prospectors Battle With Grizzly

Bear Weighed 1,800 Pounds and Measured Twelve Feet. Two prospectors, Edward Forsman and J. Kennedy, after an exciting battle shot a grizzly bear in the White Creek district near Terrace, B.C., which measured 12 feet long and nine feet wide.

The animal weighed 1,800 pounds, the skin measured 100 pounds and measuring 12 feet long and nine feet wide. Its footprints was 18 inches long and 8 inches wide. The bear found the prospectors and it took five bullets to kill him, and when he fell he was but two feet away from Kennedy who had become entangled in the brush. It is one of the biggest bears ever shot in the district.

Land for Returned Soldiers. Park lands with an estimated area of 125,000 acres located in the Riding Mountain forest reserve at Manitoba were thrown open by the Dominion Government for free settlement by discharged soldiers. The land extends in patches throughout the entire reserve and is divided in 142 parcels.

Lots of men wouldn't know what to do with their money if they should ever get out of debt.

as an economical outlet for post war get out of debt.

May Cut Second Panama Canal

Present One Will Soon Be Inadequate For World's Commerce

It is being proposed that the American continent should be cut through again.

The present Panama Canal is used by an ever-increasing number of ships, and all the authorities are agreed that in five years' time it will be quite inadequate for the world's commerce. This being so, it is not surprising that plans must be greatly widened, or a second canal must be cut, and the general opinion of the experts leans to the cutting of a new canal.

This would have to be much larger than the present waterway, and such a gigantic undertaking would occupy a number of years, so it is suggested that work should be begun at once.

But two old controversies have broken out with renewed vigor. The first is as to where the new canal should be cut and the second as to whether a canal with locks or a sea-level channel is the better.

There is a possibility that, instead of making a second canal at Panama, the route to the Pacific might be followed. This was the original plan of the Americans before they took over the French works at Panama, and as far back as 1858 a survey was undertaken on behalf of a British company.

Due to climatic causes ships would have to spend forty-three hours more on the Nicaragua route than by way of Panama, but against this the Nicaragua route is shorter than the Panama route by 500 miles shorter than the ends of the Panama Canal.

Present from South Dakota

Shipment of Highborn Sheep from Canadian Rockies

Park wardens at Banff National Park, Canadian Rockies, have been asked to capture eight Highborn sheep to be presented to the people of South Dakota. Some time ago, Mr. W. N. Nelson, chief of the Bureau of Biological Service at Washington, applied to the Commissioner of Canadian National Parks for eight animals to stock the South Dakota State Game Park, as he considered that the Canadian National Parks were the best source of supply for such healthy Highborn sheep could now be obtained. This would be the second shipment of Highborn sheep this year to the United States. The February twelve head, eight ewes and four rams, were presented to the Montana National Bison Range, Bison, Montana.

Used Bayonet to Save European

Nairobi Policeman Rescued Traveller From Intemperate Leopard

The first instance of a leopard being bayoneted has just been recorded. A leopard had been fired at and wounded at a small station on the Uganda railway. In its rage it made for a European, bore him to the ground and began mauling him. A native policeman, who was standing near, immediately fired his bayonet and charged. He caught the leopard in the chest and killed it instantly. Then with a heave he picked up the body of the European.

The white man is in Nairobi Hospital, but is not very seriously injured. The motion picture films exported from the United States to end, reach a distance of 4,000 miles.

The Baltic Sea has an average depth of only forty-three yards.

Indications Point To Canada Leading The World As A Wheat Producer

Senator Clough, of New York, recently declared his conviction that the United States would soon fall behind Canada in wheat production.

"The Dominion," he stated, "will develop several times the wheat acreage of the United States." Herbert Hoover, the United States Secretary of Commerce, but a short while previously had been responsible for the statement that the United States would in ten years become a wheat importing nation. In 1921 the United States was the world's first wheat producer, whilst Canada had risen from the third place she held the year before, to that of second among the wheat producing countries of the world.

"The peak of wheat acreage in the United States," Senator Clough said, "was 75,000,000 acres, reached in 1919, an increase of 35 per cent. over the wheat acreage of 1910. Canada, in the same years, had 15,125,000 acres, an increase of 110 per cent. over the 1910 figure." But this figure was by no means a peak for Canada, but merely a step in a series of gradients. The 1921 acreage was 23,261,224 in Canada, or an increase of more than 21 per cent. over 1919.

In addition to this the prairie provinces, where the greatest expansion in acreage is taking place, are, according to the estimate of the Western Agricultural Agent of the Canadian Pacific Railway, an increase of nearly 30 per cent. over last year, but a large section of which, will be devoted to wheat.

The production of wheat in the United States increased from 65,000,000 bushels in 1910 to 125,000,000 bushels in 1920, an increase of approximately 35 per cent. In the same period Canada's wheat production increased from 14,939,000 bushels to 26,189,200 bushels, or an increase of 75 per cent. The value of the wheat crop in the United States during the same time had increased by 100 per cent., from \$460,000,000 to \$1,197,000,000.

It must be borne in mind when considering these figures and noting the leading fact the United States still has more Canada in wheat production that the former has to all intents and purposes reached its limit of production—in fact the tendency is for a decline—whilst the Dominion, in view of the minute portion of her area under cultivation, and the wonderful resources of the prairie provinces, may be considered as having merely entered the "White" in the three prairie provinces of Manitoba, Saskatchewan and Alberta there are less than 121,000,000 acres under private ownership. The title was not used in the United States, there are approximately 25,000,000 acres of a surveyed total of 200,000,000 acres available for homestead entry. In addition to these surveyed areas, there are tracts which have been partly surveyed and which contain more than 250,000,000 acres.

The biggest factor in increasing Canada's wheat acreage in the past and one which will be felt to an increasing extent in the future, is the very availability of large tracts of land upon which hinges the price of farm wheat lands, and which determines the price at which wheat can be grown. The average price per acre of land devoted to wheat growing in the United States has been returned at \$24, whilst the average in Canada of settled wheat land has been unofficially estimated at \$10 per acre. This is not a just estimate for all purposes is evident when it is considered that the average price of settled farm lands in Saskatchewan and Alberta, most of which are wheat lands, is less than \$25 per acre, and in addition there are these large tracts which may be acquired for a lesser sum or for the price of fling on them.

The future of Canadian wheat, as presented by its excellent quality, which is beyond question. This has been attested by ten years of uninterrupted successes in carrying off the wheat championship of the world, and was wrested from Canada last year by the State of Montana, only by means of a change in the title of the world. How long will it be before Canada is leading the world in the production of wheat? At the present time she occupies the second place in this regard, and a country of less than nine million people is accounting for approximately one-quarter the wheat yield of the United States, a land of more than one hundred and nine million. In the last decade Canada's wheat production increased by 70 per cent. and granted the agricultural immigration, which would seem to be promised her with all the attractions she has to offer, and the settlement of a further portion of her vacant acreage, the present decade should see at

least a hundred per cent. increase and Canada the granary not alone of the British Empire, but of the entire world.

Canada Can Under Sell Manchurian Mills

News from Orient is Very Encouraging

Latest flour and grain news reaching Vancouver from Manchuria is encouraging to Canadian exporters to the Orient, though not very cheering to Japanese who have invested in Manchurian flour mills. There are forty-five milling companies operating in that country, with a capacity of nineteen million sacks. Forty per cent of the mills are owned by Japanese. One of the most famous is the one-third and it is said that if the condition continues much longer the mills will be closed.

The reason given for the depression is that the Manchurian wheat is exported largely, thus making the price of wheat in the Orient very high and permitting Canadians and Americans to send large quantities to the wheat province and undersell the Manchurian mills.

Canadian Birch Popular

Competing Keenly With American Variety in United Kingdom

It is stated that in the United Kingdom lumber trade the Canadian Birch is proving not only popular but is competing keenly with the American variety. Canadian exporters are laying their wood down in England at prices lower than the American.

This is regarded as a healthy sign, inasmuch as it is considered that Canadian Birch is broadly used by Canada and similar broader-based woods, could meet the market in a price way. It is stated that the trade in logs should have considerable increase in the trade with the United Kingdom, inasmuch as it is understood English users of wood will shortly begin making their own veneers. This is due to the fact that the differential between the price of logs and plywood would thus be a most profitable operation for the manufacturers.

A Curious Relic

Last of Japanese Notice Boards Issued in 1867

A curious relic of the days when Christianity was prohibited as a pernicious sin in Japan is on view at the Africa and Far East exhibition at the Agricultural Hall.

It is the last series of the old notices boards issued by the emperor of Japan in 1867, a crude wooden "slate" painted in black Japanese lettering. The notice reads:

Prohibition of Christianity is to be observed strictly as heretofore. 2. Superstition is strictly prohibited.

This old regulation was the last to appear before the state consented to recognize the teachings of Christianity.

The World's Gold

American Financiers Concerned Over Amount in United States

The approximate amount of gold money known to exist in the world is \$400 million dollars. Of this amount the United States now holds some forty per cent—more than any single nation ever before had. In its possession at one time. For the last year all has been income and no outgo. The presence of such riches has been a source of great satisfaction, but as a matter of fact it is giving American financiers a great deal of concern. They fear that the pressure of so much gold and silver about another period of inflation and high prices—Orville Parker.

A Mammoth at Niagara. Geologists say that 150,000 years ago there were animals in America which had teeth three feet long and more than twelve inches thick. Such a tooth was drawn out of the sand at Niagara Falls by a dredge the other day, and now efforts are being made to find the owner of it. The belief of scientists is that the skeleton of a mammoth lies under the sand—low far down it is impossible to guess. They think, however, that probably the head is not very deep down, and that the dredge broke the skull when it fished the tooth up.

The first big electric sign that started Broadway's white way in New York was put up in 1931.

Street railways have in Wisconsin average lower than in any other State.

WORLD HAPPENINGS BRIEFLY TOLD

Dr. J. A. Baneroff who resigned the city of installing in McGill a year ago, will return to McGill in the autumn.

Isaac Jan Pederswold will return to the plane next fall. During the United States and Canada, it has been announced.

Fire completely destroyed the railway car factory of the Greenstein and Koppel works at Spandau, Germany. Damage was done to extent of several millions of marks.

W. H. Robinson, aviator, and two men passengers were burned to death at Los Angeles when the airplane in which they were flying caught fire and fell.

The skeleton of John Collins, a Belgian farm hand, who disappeared under mysterious circumstances from High Bluff farm last January, was found on the outskirts of Winnipeg.

The Swiss Government, it was announced has decided to adhere to the St. Germain convention for international control of traffic in arms and ammunition. The decision is subject to approval by the Swiss Parliament. Shortage of foods has grown acute in Dublin. The shops are charging exorbitant prices for eggs, bacon and bread. No textiles and only a few sewing machines are available and the drivers demand extra payment for the risk they run, allowing no discount, however, for the risk the passenger takes. The newspapers ask double price for papers.

A new town of about 1,500 population will be established between Elko and Waldo, B.C., in the Crow's Nest Pass country, if plans of a syndicate of Chicago capitalists for establishment of a pulp mill on the Elko River materialize, according to D. MacNab, of Waldo. An expenditure of about \$250,000 is involved.

The Royal Mail liner Orbita was successfully navigated through a narrow channel leading to Portsmouth Harbor by electrical signals from the Admiralty's submarine cable laid 20 miles out to sea, with the object of lessening the fog peril near the harbor. The Orbits up to the present time is the only ship on which the necessary equipment has been installed.

When a fellow needs a friend—

EVER wake up in the morning feeling fagged and foggy?

Tired muscles and weary brains call for a breakfast of Grape-Nuts, or, friendly, easily digested food, to fortify against exhaustion.

Grape-Nuts repairs the daily wear and tear on body tissue. It provides the essentials for rebuilding body and nerve cells; lime for the teeth and bones; iron for the blood.

Make this crisp and toothsome cereal a regular part of your daily diet. Made from wheat and malted barley, and partially pre-digested by 20-hours' scientific baking, Grape-Nuts with cream of milk is a complete food—satisfying, without overtaxing the digestion.

Sold by grocers everywhere!

"There's a Reason" for Grape-Nuts

Made by Canadian Postum Cereal Co., Ltd., Windsor, Ontario

Hard Water Softened by Peat. Hard water can be softened by merely pouring it through a bed of raw peat, the softening being effected by the formation of insoluble calcium and magnesium salts by reaction with acids that are normal constituents of the peat, and all the hardness is taken out of the water in passing through it. It is thought that if this process could be profitably adopted, the result would be quite an achievement.

O. McPherson, Publisher, Des Moines, Iowa, U.S.A. McPherson's Lithium Co., Ltd., Toronto, Ont., Canada.

These three—the start of household news—have been found with one another, and it is thought that if this process could be profitably adopted, the result would be quite an achievement.

W. E. McPherson, Secretary, Toronto High School, Toronto, Ont., Canada.

Screen for Car Windows. In a new type of street car a heavy wire screen is attached to the bottom of each window so that as the window is raised it lifts the screen to cover the opening.

Your Home Medicine Chest.—Among the standard household remedies that should always be on hand in your home medicine chest, none is more important than Dr. Thomas' Electric Oil. Its manifold usefulness in relieving pain and healing scratches is known by many thousands throughout the land. Always use Dr. Thomas' Electric Oil for rheumatism and sciatica, neuralgia, treating sore throats and chills, coughs, burns, scalds, cuts, bruises and sprains.

Blind Man's Invention. An automatic bookmark has been invented by a blind man, a weighted strip of flexible material falling into place as pages are turned.

Corns cannot exist when Holloway's Skin Reviver is applied to them, because it flows to the root and kills the growth.

During the last ten years New York city gained 154,285 in population. More people live within her boundaries than in any state except Pennsylvania, Illinois and, of course, New York state.

The world's record for Sunday School attendance is probably that of Owen Jones, of Liverpool, England, who has been a regular attendant for more than 24 years.

\$12 Becomes \$20,000,000

The largest advertiser of any single product in the world is a Chicago chewing gum manufacturer who started with a capital of \$12 and now has a business with an annual turnover of more than \$20,000,000.

GROWING BOYS AND GIRLS

Need Rich, Red Blood to Keep Up Health and Strength.

It is a mistake to think that anemia is only a girl's complaint. Girls probably show the effect of weak, watery blood more plainly than boys. But many boys in their teens grow thin and weak, showing that they have not enough blood or that it is thin and watery. Let the boy in this condition take Dr. Williams' Pink Pills for Pale People. They will restore his strength and his health becomes pronounced. To overcome this trouble give both your young boys and girls Dr. Williams' Pink Pills and see how soon good appetite returns and the weak boy or languid girl becomes full of activity and high spirits.

Mrs. P. J. Gray, R.R. No. 6, Monroville, Ont., tells what this medicine did for her young son. She says:—"Three years ago, my little boy, who was then 11 years old, in this very pale and weak, he would take fainting spells and complained of a pain about his heart. One day a lady friend who noticed his run-down condition told me her daughter had been in a similar state and found new health through Dr. Williams' Pink Pills. I therefore got a supply for my boy, and by the time the first box was used, his appetite seemed better, and by the time he had taken half a dozen boxes everyone was surprised at the change in his condition. He was such a fine, healthy-looking boy. He had grown tall and stout, with no signs of his former run-down condition. I therefore got Dr. Williams' Pink Pills are unequalled for anyone weak and run-down."

Dr. Williams' Pink Pills are sold by all medicine dealers or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

In New Guinea both men and women are subjected from infancy to a distention of the lobes of the ear unit in maturity the orifice is so large that a ring can be inserted as big as a child's small hoop. It is their notion of beauty.

Color-blindness, hearing, the sense of touch and other perceptions in individuals can be measured by a newly designed apparatus.

Among the headhunting tribes of Borneo custom forbids a widower to remarry until eight months after the death of his wife.

Dangerous Cargoes

Salorra Distake to Sail With a Cargo of Sugar or Coffee

At first thought it would seem that a cargo of sugar or coffee would be avoided, but from a sailor's point of view there are far more dangerous cargoes. He dreads, for instance, a cargo of sugar! Put hundreds of tons of cane sugar in the hold of a vessel and let the ship steam through a spot of hot weather, the danger is alarming. The sailors can not get the sweet taste out of their mouths and grave vinegar or lime juice—anything sour? They lose their appetites and are always dead when a voyage on which the cargo was sugar is over. Coffee is as disagreeable as sugar, in addition being very dangerous.

Cotton is a really dangerous cargo. If a little oil happens to touch a cotton the result is spontaneous combustion. A single bale of cotton saturated with such an oil as boiled linseed and lying at the bottom of a hold can be compared only to a slow match attached to a bomb.

Acids and other chemicals form dangerous cargoes. Carbide of calcium, for example. Acetylene gas is made from carbide and water. Gas is constantly given off if the product is exposed to air.

A patient desiring to carry drums of acid where they can be reached easily. A Chilean ship recently put in at the Falkland Islands leading badly laden cargo made up of drums of acid and chalk. The acid had leaked from the drums and mixed with the chalk, forming carbide of calcium.

This gas is deadly and the crew could not make repairs. Meantime, the acid had leaked from the bottom of the drums and had eaten away the iron frames there.

The Family Physician.—The good doctor is always worth his fee. But he is not always accessible to the patient just when you want him. In such cases, the family physician is the most reliable home remedy, such as Dr. Thomas' Electric Oil, which is wonderfully effective in relieving toothache, neuralgia, rheumatism, and other pains and healing cuts, scratches, and abrasions. The presence of this remedy in the family medicine chest may save many a fee.

Circle Tours Through the Canadian Pacific Rockies

Delightful Trip Offered for Tourists Over C.P.R.

By the most magnificent mountain and inland water trip in the world, passing through beautiful Banff, over by Lake Louise, Field and Glacier House to Arrowhead and returning through the Arrow and Kootenay Lakes, winding in and out past majestic mountain peaks—meddling at West Nelson and Nelson carouse.

This delightful trip can be made in the opposite direction if desired and at remarkably low cost.

Any Canadian Pacific ticket agent will gladly give full information and arrange details.

Manitoba Butter Wins

Awarded Prizes at Exhibitions in Calgary and Edmonton

For years butter made at Manitoba creameries has won an enviable place at the leading Canadian exhibitions. Word has been received by the Department of Agriculture of the awards won at Calgary and Edmonton by an exhibit placed by the Brandon branch of the Crescent Creamery Company.

This company won two first prizes on May butter at Calgary; one first, one second, and two thirds at Edmonton. Winnings at Calgary also include a bronze medal and diploma for third highest average score given to any butter on exhibition; also a special prize of \$15 and provincial championship ribbon.

"There were twenty-two creameries entered in these exhibitions, from Quebec, Ontario, Saskatchewan, Alberta, Manitoba and British Columbia," said Mr. Gibson, Dairy Commissioner.

1,500 Telephone Directories

About 1,500 different telephone directories, with an aggregate circulation of 25,000,000 copies a year, are issued by the principal telephone systems in the United States. To print and distribute the directories costs the corporation approximately \$8,000,000 a year.

Fountain Paint Brush

An Iowa man is the inventor of a fountain paint brush that combines the accuracy of a hand brush with the speed of a spray device.

MacKenzie, the largest political division of Canada, has an area of 567,193 square miles.

Opera performed in Berlin and transmitted by wireless telephone was distinctly heard 800 miles away.

Woman Founded Successful Firm

Business Started in 1870 Now Has 100 Branches

One of the romances of business in London was ended by the burial at Putney Vale Cemetery of Mrs. Greig, the founder of the famous provision firm of David Greig.

Mrs. Greig, who was 85, left her native town, Montrose, in Scotland in 1870, and came to London to seek her fortune. She opened a small provision shop in High Street, Hoxton, and the business flourished so well that it was not long before branches were opened.

David Greig, who had assisted his mother, went to Britain in 1879 and started a branch. That branch became the headquarters of the firm, which has now 100 stores in all parts of London, and is one of the largest and most reputable trading concerns in its kind of business in the south of England.

Mrs. Greig continued to direct the business up to 20 years ago, when she retired. She, however, took great interest in the firm's affairs up to the time of her death.

Her remarkable energy and capability were almost proverbial in the provision trade, and she furnished one of the most notable examples of woman's success in business in London.

An Engaging Chinese Figure

General Wu is Givier Politician With

General Wu is the most engaging figure that has appeared in Chinese politics for a long time. He has none of the conceit and cunning that mark Sun Yat-sen's character, and seems to be free from the cantankerous and unscrupulousness of that headstrong figure in the world, Chang Tso-lin. He expresses himself well and patriotically. He does not, he says, desire office, but the opportunity to save China, abolish militarism, revive industry and gain the respect of the world. Of course men who were not so modest as they would like to seem have used such language before, but Wu adds to the impression that he is a honest, likable fellow with more than his share of brains.

Minard's Liniment for Burns, etc.

The Heart of a Prince. The secret of the Prince's conquest of all sorts of conditions of men lies in his fine nature and hearty good will. He need never pretend sympathy; he feels it. Everywhere his presence carries the sincere conviction of our determination to promote the ordered liberty and happiness of all peoples gathered under the King's rule.—London Daily Mail.

Had Your Iron Today?

Work Brains—Not Digestion

HERE'S an ideal hot-weather luncheon!

Two packages luscious Little Sun-Maid Raisins and one can glass of milk. Big men don't need more.

200 calories of energizing nutrient in the little raisins. Pure fruit sugar, practically predigested so it acts almost immediately, yet doesn't tax digestion and thus heat the blood.

There's fatigue-resisting food-iron also in this lunch.

Visual men eat like this and resist the weather. Don't work their digestion because they want to work their brains.

Try it for a few days and you'll feel better.

Farmers vs. Businessmen, in a game of baseball last Friday evening on the local lot. The game drew a good crowd and action was freely offered and seldom accepted. Bob Selzer started on the mound for the farmers and Reeva Spiece, after twelve years' absence from the game did valiant duty for the Mirrorites. Andy Lakay and Joe Eickman relieving, respectively about the middle of the game. The score at the end of the 5th was 10 to 6 in favor of the Farmers, but the hard-worked Business Men kept slug-ging away and the game ended 15 to 11 in their favor. Dr. McManus took his life in his hands and handled the indicator and his decision on balls and strikes were received without a murmur. "Chief" Beck was the base umpire while Carl McCormack attended to the foul balls. The officials were so numerous that there was little room for argument at any stage of the game.

Crank Case Service****'Dead' Oil Removed**

Even the best oil you can buy wears out in time and loses much of its lubricating efficiency. It then fails to maintain the proper piston seal. Power goes to waste. Wearing surfaces no longer receive proper protection. It is of the utmost importance that you have the old oil drained out of your crank case frequently.

You probably realize the importance of having your crank case cleaned every 750 to 1000 miles. But it is dirty work. You dislike to do it yourself. Why not have it done for you?

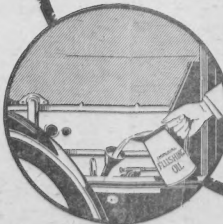

There is an Imperial Crank Case Service dealer near you who maintains a modern crank case cleaning department and he will gladly have an expert do the job properly.

And what is most important--he will use Imperial Flushing Oil for cleaning your crank case. No danger then of diluting the fresh oil which is added later as might be the case if coal oil (kerosene) were used for flushing purposes.

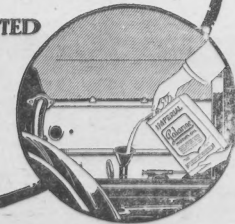

Make it a special point to drive 'round to the Imperial Crank Case dealer's sometime during the next week. Let him tell you more about this service that *saves your car and saves you money.*

**All Parts Thoroughly Cleaned**

Merely draining the crank case is not sufficient. Metal particles, road dust, dirt, grit and carbon have a tendency to adhere to the metal parts of your engine when the oil is drawn off. Imperial Crank Case Service dealers use Imperial Flushing Oil, a scientific cleaning agent, which removes all foreign matter and thoroughly flushes out your engine and crank case.

**Refilled with Fresh Oil--**

No one grade of oil could properly lubricate all different makes and models of automobiles and trucks. Different types require a special grade of oil, suited to their construction and operating conditions. The Imperial Crank Case Service dealer who refills your crank case, will use the grade of Imperial Polstone recommended for your car on the Imperial Chart--an infallible guide to proper lubrication.
